Customers Attraction

KettyBot Pro detects the customer's location and actively follows them, creating a seamless and engaging experience and making every interaction memorable.

Search & Guide

Customers can search for items or locations by using keywords or clicking on pictures. KettyBot Pro will assist customers by guiding them to the designated pick-up locations.

Enhanced Voice Interaction

The new voice interaction module integrates 360° sound localization and exclusive situational dialogues.
Wake up voice interaction easily by just saying "hey PUDU".

Smart Trays Detection

With its advanced 360° fisheye lenses, the KettyBot Pro can autonomously detect the load status, optimizing delivery processes and boosting customer satisfaction.
